Green Chemistry Education: Catalyzing change for a sustainable future

Kate Anderson
Director K-12 Education
Beyond Benign
www.beyondbenign.org

Beyond Benign

- Non-profit organization
- Headquarters located in Wilmington, MA (~20 minutes north of Boston)
- Employees based in MA and CO; Curriculum specialists nation-wide and world-wide

Co-founded by John Warner and Amy Cannon in August of 2007

Mission and Vision Statements

Beyond Benign is dedicated to providing future and current scientists, educators and citizens with the tools to teach and learn about green chemistry in order to create a sustainable future.

Beyond Benign's vision is to revolutionize the way chemistry is taught to better prepare students to engage with their world while connecting chemistry, human health and the environment.

Why Revolutionize Chemistry Education?

Change public perception of chemistry

 Green chemistry is the best practices of chemistry of today and the future

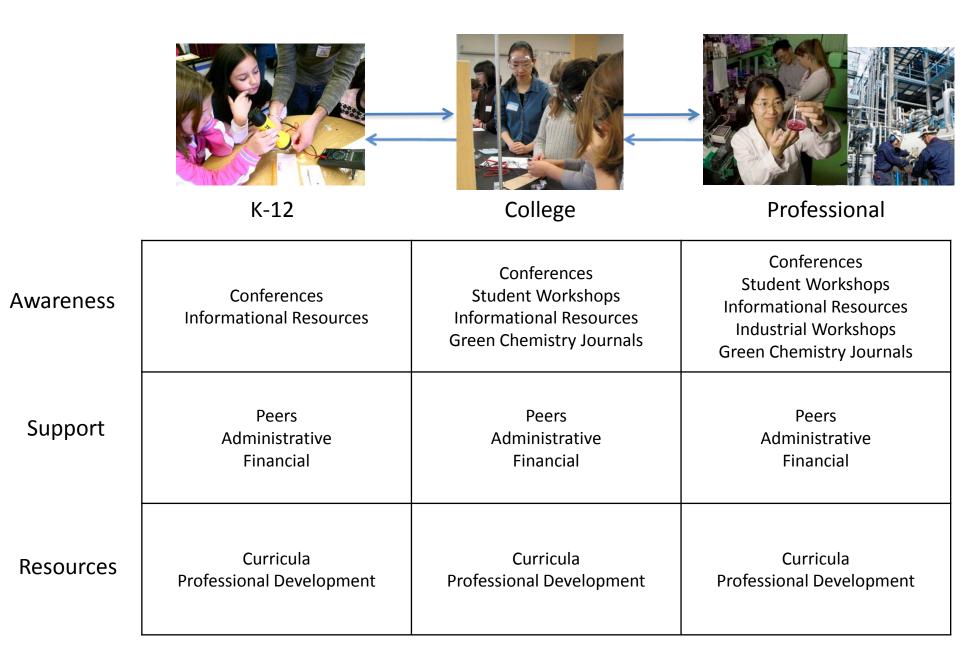

Chemistry fundamentals are of paramount importance

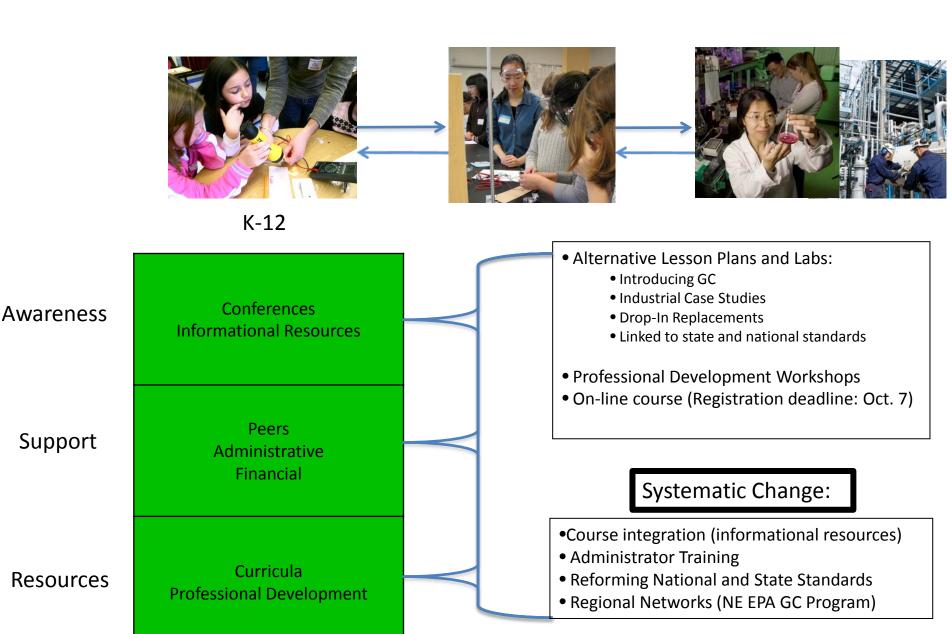

But only truly make sense to your students if they are connected to something in their world.

Core Philosophies

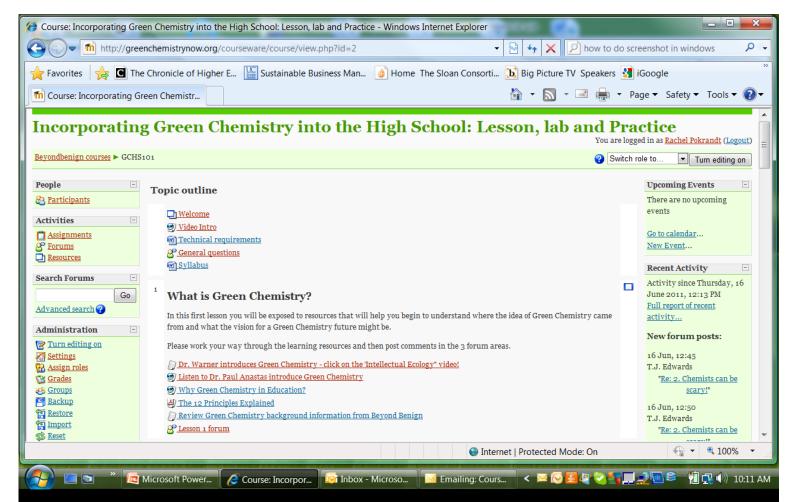

- ✓ Teachers teaching teachers
- ✓ Core values of sustainability
- Multiple learning styles and abilities
 - ✓ Demystifying science
 - ✓ Activity based approaches
 - ✓ Open access education materials
- ✓ Based on industrial approaches to Green Chemistry

Courses

- Simmons College, Fall 2011 Toxicology and Environmental Health Sciences
- Toxicology for Chemists Workshop for Faculty

Green Chemistry Commitment

The Green Chemistry Commitment is a systematic response to the demand for safer, non-toxic products and processes, shifting our educational institutions to prepare students to enter the workforce armed with the skills and knowledge to create society's next generation of sustainable materials. The Commitment is a bottom-up approach, allowing for schools, colleges and universities to begin to change the education of a scientist today.

Green Chemistry Commitment: The Call for Systematic Change

- A systematic, unifying approach
- Responding to demand from industry and students
- Raising awareness
- Providing support (peer, administrative, financial)
- Platform for resources
- Bringing green chemistry education to the next level

The Green Chemistry Commitment: Next Steps

Fall 2011:

Advisory board working group

January 2012: New England
Green Chemistry
Commitment Summit
Meeting

June 2012: First launch of Commitment

Faculty Advisory Board:

- Arizona State University
- Bridgewater State University
- Gordon College
- Simmons College
- Suffolk University
- Tufts University
- University of California Berkeley
- University of Massachusetts Boston
- University of Minnesota
- Worcester State University

Outreach Fellows Program

 College students (Gordon College, Salem State University, Boston College, Emmanuel College, Simmons College, Northeastern University, Suffolk University, Tufts University MIT)

• Inspiring K-12 students

 Green Chemistry Projects (greening labs, outreach, mentoring middle and high school students with science fair)
